

Developments in EUMETNET

EWGLAM meeting, 30 September 2024

Jitske Burgers, Programme Manager Capacity Capability Area

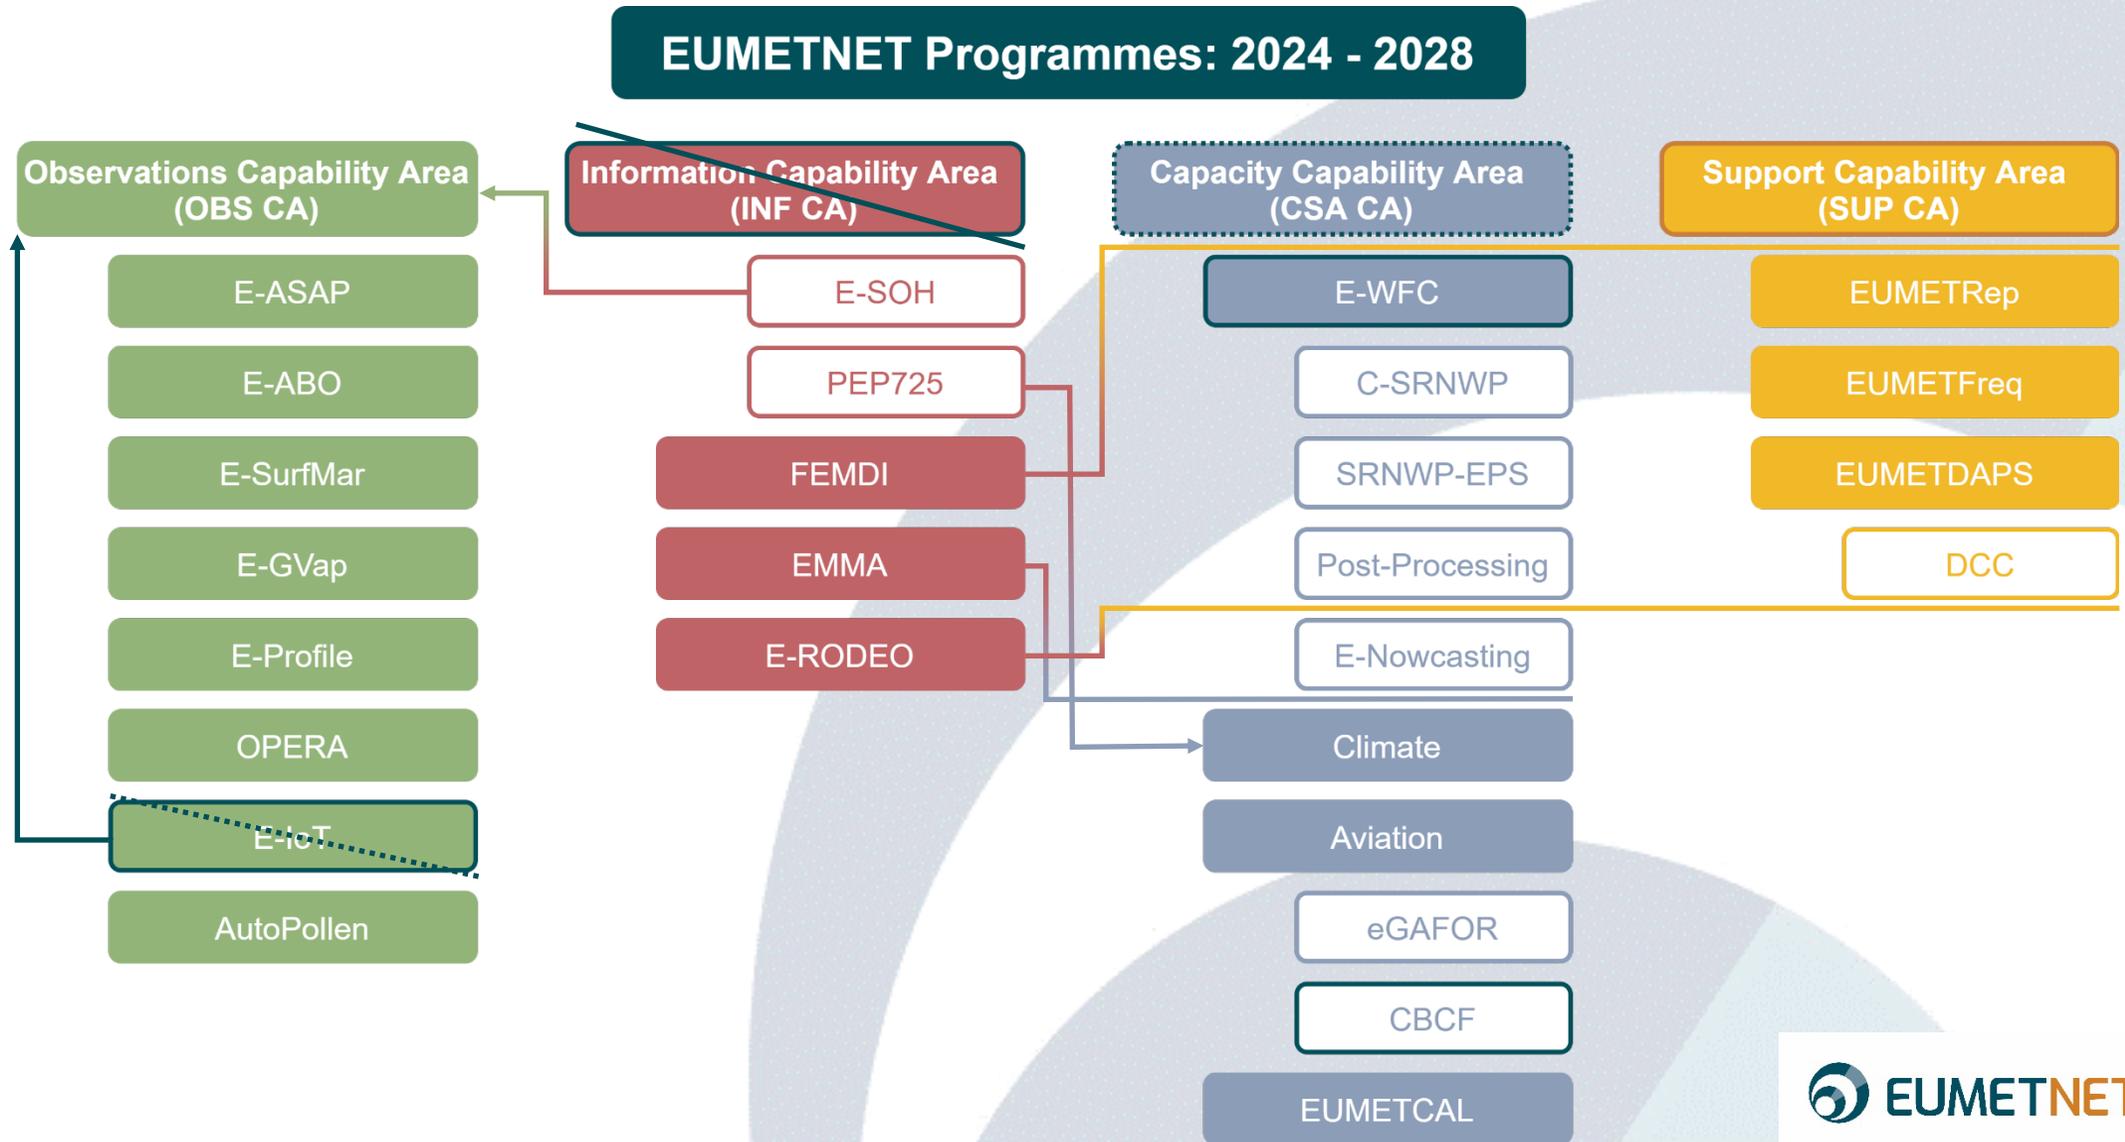

Short introduction

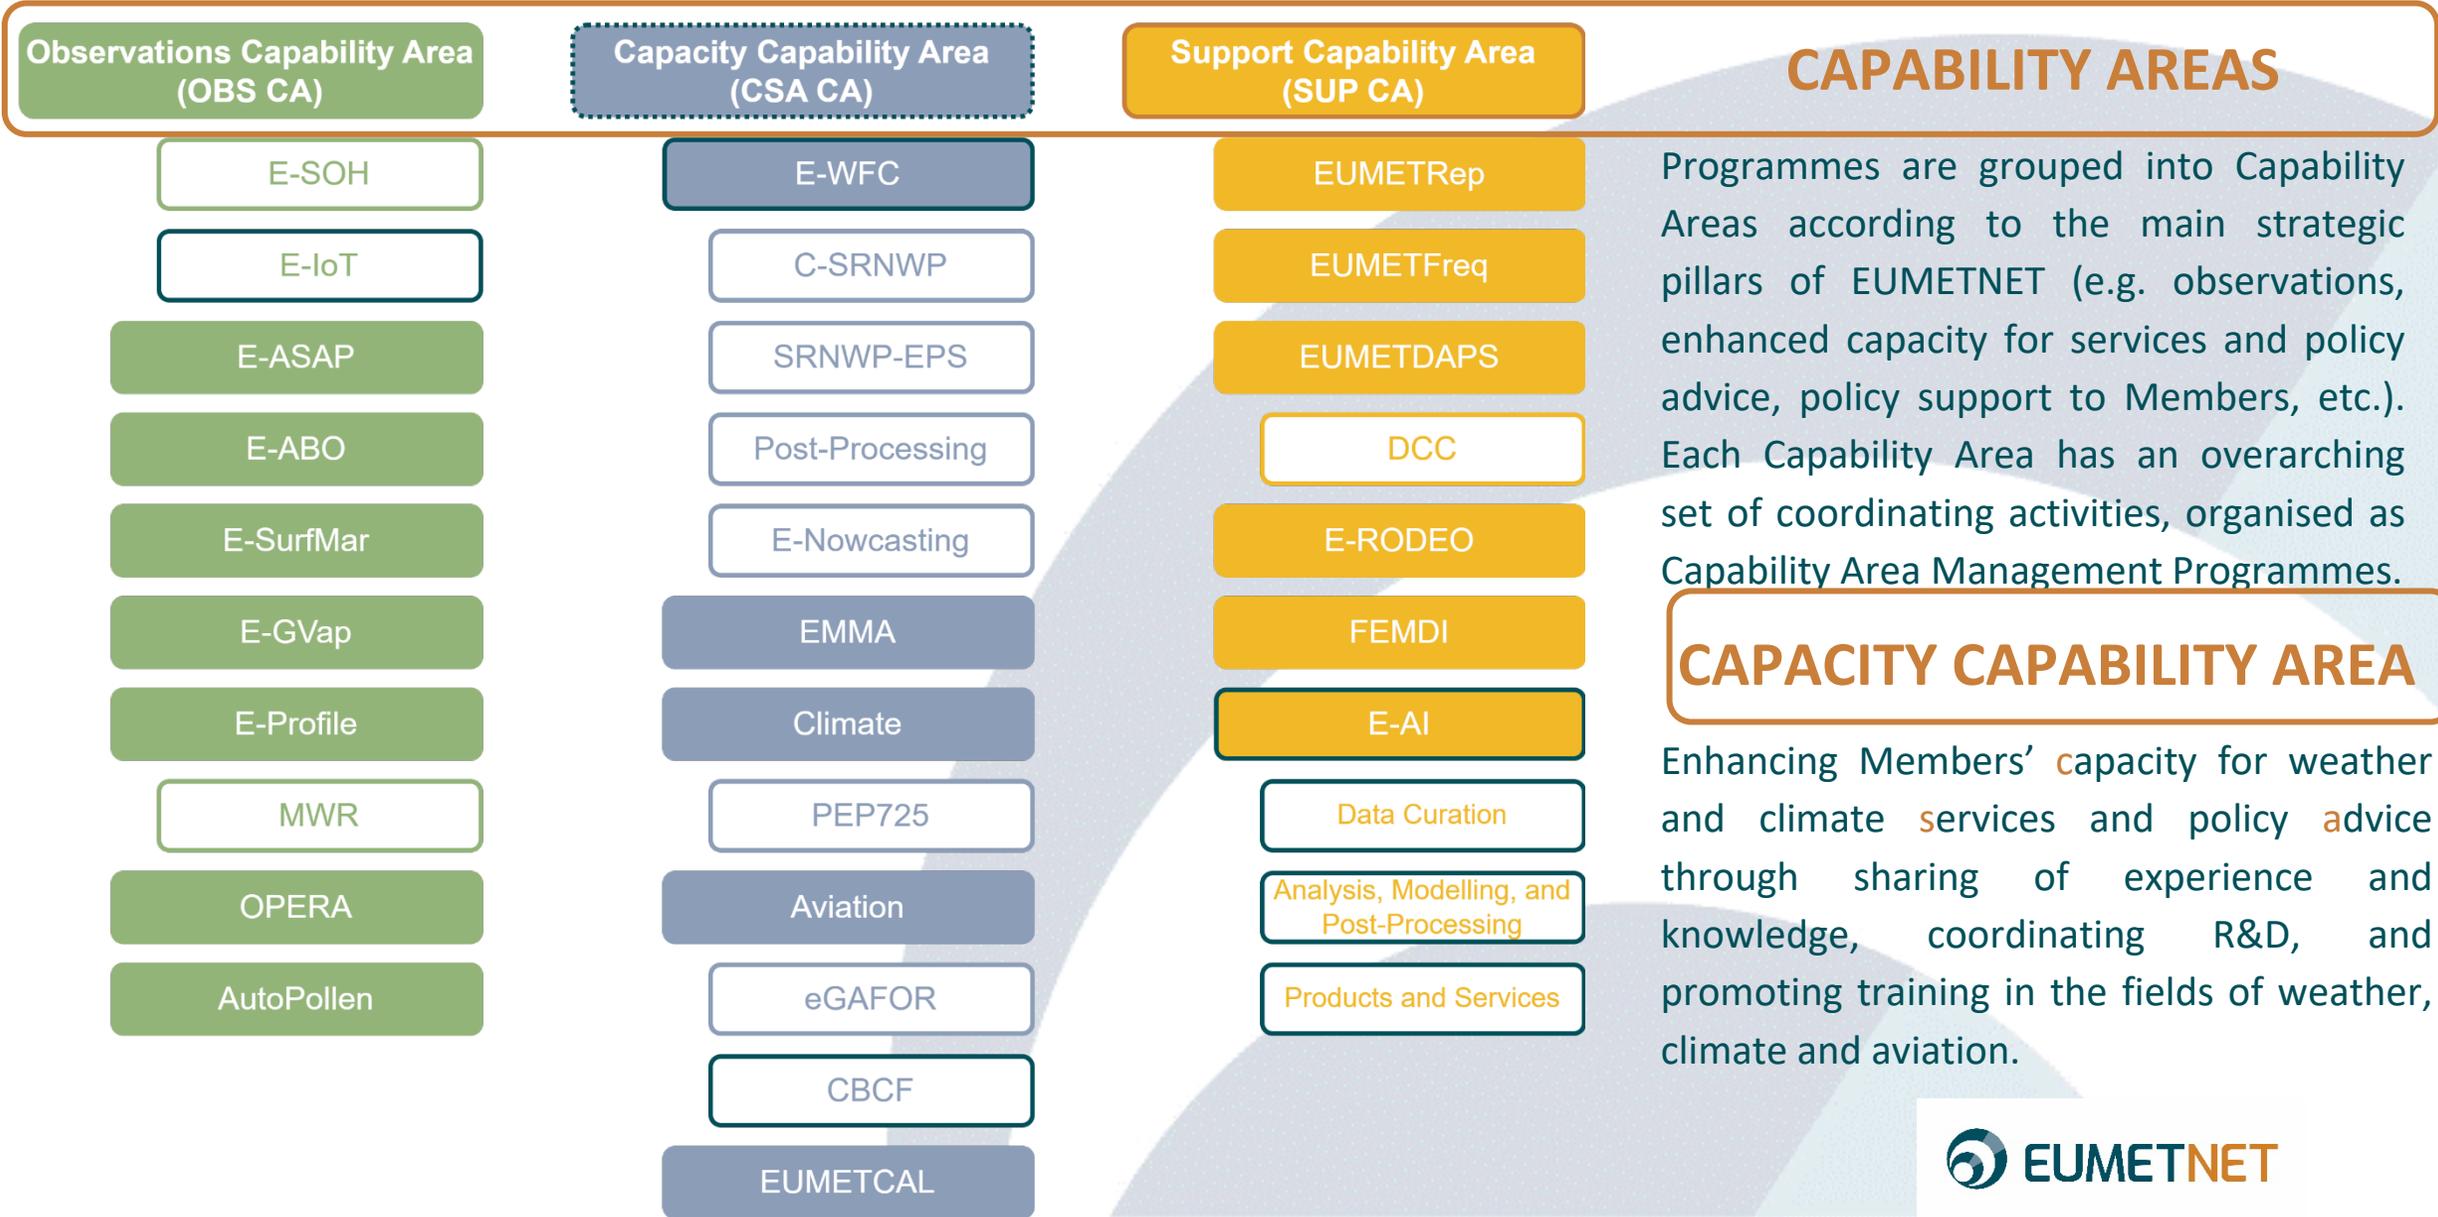

- Since mid-April 2024 I took over the role of CSA CA Programme Manager from Aline Kraai.
- Many years of PM-experience in large (international) projects with a complex stakeholder management component.
- Live near Utrecht with my partner and two kids.
- Love to cycle, hike, read, cook, go on holiday,...

2024 – 2028 Programme phase approved – New structure

EUMETNET Programmes: 2024 - 2028

Main objectives EUMETNET CSA CA Programme

- Coordinate development and knowledge exchange to enhance capacity for weather and climate-related services and advice for policy makers.
- Guide and coordinate the delivery of the CA's major strategic goals and related strategic objectives.
- Oversee, exploring potential synergies, and provide strategic advice to the Programmes assigned to the CA and other Programmes related to Capacity strategic objectives.

Cooperation within the CSA CA Programme

- CSA newsletter
- establishment of several Expert Teams
- but also within the different programmes synergies are being achieved, also for the E-WFC programme

CSA newsletter

 **Burgers, Jitske (KNMI)**
CSA CA PM

Start new phase 2024-2028

It's been a while ago since the last newsletter, and there have been some changes within CSA that we would like to share with you. Because of these changes, this time, not only Heads of Forecasting (HoF) will receive the newsletter, but also Heads of Clima (HoC) and the Working Group AVIMET.

First, I would like to introduce myself. KNMI has found a successor for Aline Kraai, and that person is me: Jitske Burgers. I am a colleague of Aline, with several years of experience as a project manager, mostly on internationally funded projects. Additionally, I was involved in composing the new Dutch climate scenarios, which were published in October 2023. I want to sincerely thank Aline for all her hard work at EUMETNET over the past two years, and I am excited to step into this role.

In the diagram below, you can see the new structure of the EUMETNET programmes. The Forecasting area has been renamed in this new phase to **CSA CA** (Capacity for Services and Policy Advice Capability Area). The CSA CA now includes the following programs:
